

SUMMER TALKS 2013

BIO-INSPIRED FUNCTIONAL MATERIALS

Venue: Building 801,
Lecture Room P 142

■ **August 1st, 3 – 4 p.m.**

“Coordination chemistry of cyclic peptides:
possible biological functions of the patellamides”

Prof. Peter Comba

Anorganisch-Chemisches Institut, University of Heidelberg

■ **August 8th, 3 – 4 p.m.**

“Inorganic radiopharmaceutical chemistry”

Prof. Chris Orvig

Department of Chemistry, The University of British Columbia, Vancouver

■ **August 23rd, 3 – 4 p.m.**

“Copper(II) and gallium(III) complexes of cyclen
and cyclam derivatives for medical applications”

Prof. Rita Delgado

Instituto de Tecnologia Química e Biológica, Universidade Nova de Lisboa

Organized by Dr. Holger Stephan and Dr. Kristof Zarschler

Institute of Radiopharmaceutical Cancer Research, Helmholtz Virtual Institute “NanoTracking”
