

CALIPSOplus – Grant Application for Open Access Publication

An Integrating Activity for Advanced Communities in Horizon2020

Grant Application

In CALIPSOplus authors, receiving Transnational Access funding by CALIPSOplus, can apply for a **grant to cover the open-access publishing fees** in order to cure this problem and at the same time encourage users to open access publishing. Funding will be given – upon application to the coordinator – with priority to users from countries/ institutions with very small research budgets but wishing to publish excellent research in **“gold” open access journals**.

Grant application

The applicant should send the application via email to the CALIPSOplus Management (email below) including the following information:

- Abstract of the project
- Journal to be published
- Draft of publication or accepted paper
- Facility, beamline and date of beamtime where/when experiments, the publication is based on, have been measured

Proposal evaluation by CALIPSOplus Executive Board

Proposal evaluation by the CALIPSOplus Executive Board

Funding information

Applicants will be informed about evaluation results and will receive further information if the proposal has been approved for funding.

Acknowledgement

This project has received funding from the European Union’s Horizon 2020 Research and Innovation programme under Grant Agreement No 730872.

Open Access to scientific publications

Open access (OA) refers to the practice of providing online access to scientific information that is free of charge to the end-user and reusable. 'Scientific' refers to all academic disciplines.

Why open access to scientific peer-reviewed publications?

Good for science

- Allows scientists to build on previous research results and avoid unnecessary duplication of effort
- **Improved quality and greater efficiency**

Good for economy

- Speeds up innovations
- **Faster progress to market**

Good for society

- Makes research available to individual citizens and non-profit organizations
- **Greater transparency**

How to achieve open access in Horizon 2020

Open Access publication in Horizon 2020 is possible by means of so-called “Gold Open Access” and “Green Open Access” publication, respectively.

Gold Open Access

Articles published in open access mode (publishing costs borne by the authors, universities or institutes etc.)

e.g. New J. Phys., Optics Express, Nature Comm. Peer-reviewed, purely electronic journals

Green Open Access

Published articles or the final peer-reviewed manuscript are deposited in an online repository.

e.g. ArXiv.org

Both options are possible. **In order to promote the Gold Open Access route** grants are awarded for publishing results of experiments supported from the trans-national access program of CALIPSOplus in gold open access journals.

Not eligible for this support scheme is the publishing in **hybrid open-access journals**. In these subscription-based journals open access is only provided to some individual articles; usually this requires the payment of a publication fee by the author of the specific article, complementing the revenue of the publisher resulting from the subscriptions (“double dipping”).
