

FROM LEIBNIZ TO HELMHOLTZ - RESEARCHING IN A NEW ASSOCIATION

Time: 3:00 p.m.

Place: Lecture Hall access via entrance building

As the research center Forschungszentrum Dresden-Rossendorf has become the Helmholtz-Zentrum Dresden-Rossendorf, the new „HZDR Lectures” series revolve around those current topics of the Helmholtz community which are also addressed by the HZDR researchers.

We are proud to announce that we have managed to book high ranking experts with most of them coming from the Helmholtz Association. We are convinced that the Helmholtz perspective of joint issues will illuminate our own approaches, perhaps even examine these issues critically while at the same time focusing the visions and encouraging new and even closer cooperation. The speakers will also briefly introduce the structures prevailing in the diverse Helmholtz research fields which will certainly help HZDR scientists orient themselves better within the new association.

After the presentations participants will have the opportunity of discussing and exchanging their views over some pretzels and beer.

We look forward to seeing you.

Prof. Dr. Dr. h. c. Roland Sauerbrey
HZDR Scientific Director

07.03.2011

Prof. Dr. Robert Stieglitz
Karlsruhe Institute of Technology
Liquid metal technologies

14.03.2011

Prof. Luisa de Cola
Westfälische Wilhelms-Universität Münster
Self-assembly of molecules, nanomaterials and living systems

11.04.2011

Prof. Dr. Philipp Gütlich
Johannes Gutenberg-Universität Mainz
In situ spectroscopy on Mars – NASA rovers with Mainz spectrometers find evidence for water

15.04.2011

Prof. Dr. Rainer Waser
Forschungszentrum Jülich
Oxide electronics or multifunctional oxides

16.05.2011

Prof. Claes-Göran Wahlström
Lund University, Sweden
Laser-plasma acceleration of electrons and protons
