

GERMAN-TURKISH WORKSHOP*

January 31 – February 3, 2011, Antalya, Turkey

SUPERCONDUCTING ACCELERATORS FOR FEL- AND BREMSSTRAHLUNG APPLICATIONS

Organizing Committee

P. Michel	HZDR, Chair
S. Ozkorucuklu	TAC, Co-Chair
A. Aksoy	TAC
U. Lehnert	HZDR

Speaker

I. Akkurt	TARLA Bremsstrahlung
A. Aksoy	TARLA Electron Gun Concept TARLA Beam Transport TARLA FEL Concept
A. Arnold	Superconducting Resonators
A. Büchner	ELBE Low Level-RF ELBE Water Cooling System
H. Büttig	ELBE Power RF Systems
M. Freitag	ELBE Vacuum System
M. Justus	ELBE Control System and IT Architecture
O. Kabukcu	TARLA Cryogenics Concept
G. Kalayci	TARLA RF Concept and Plan
Ö. Karşlı	TARLA RF Power Systems
C. Kaya	Bunch Length Measurement at ELBE

E. Kazancı	TARLA Building
I. Kösterke	Radiation Safety
M. Kuntzsch	ELBE Timing System
E. Kurkcuoglu	TARLA Radiation Safety
U. Lehnert	ELBE Beamtransport Beam Requirements for FEL Operation
P. Michel	ELBE Overview, Project Organization ELBE Upgrade
P. Murcek	Cryostats, Mechanics
Z. Nergiz	TARLA Beam Diagnostic
S. Ozkorucuklu	TARLA Overview, Project Organization Possible Modifications on ELBE SRF Module and Current Status
C. Schneider	ELBE Cryogenics System
R. Schurig	ELBE Diagnostic Overview ELBE-FEL Operation Experiences
W. Seidel	FELs at ELBE
T. Soygul	TARLA Control System EPICS at TARLA
G. Staats	Phase Stability and Microphonics
J. Teichert	ELBE Electron Sources

*supported by Office of Naval Research Global (ONRG)
