FIFTEENTH INTERNATIONAL SYMPOSIUM ON CAPTURE GAMMA-RAY SPECTROSCOPY AND RELATED TOPICS (CGS 15)

The 15th International Symposium on Capture Gamma-Ray Spectroscopy and Related Topics, CGS 15, will continue the general themes of earlier conferences with special emphasis on gamma-ray spectroscopy, nuclear structure, nuclear reactions, nuclear data and applications related to capture reactions. Topics to be discussed during the symposium will include the following, but are not limited to only these:

- Nuclear structure
- Nuclear reactions
- Nuclear astrophysics
- Nuclear data and applications
- Statistical properties of quantum many-body systems
- Fundamental physics
