Posters

updated: 11.09.2026 (PZ)

Presenter	No.	Title	Pg.
Belloum, R.	P1	Fabrication of Edge Contacts in MoS_2 FETs via PPC Dry Transfer, In Situ Etching, and Metallization	24
Chennur, M.	P2	Electrical Impact of He^+-Induced Defects in hBN-Encapsulated Transistors	25
Echresh, A. (Puddu, A.)		Ambipolar Transport in Al–Si Nanowire Schottky Barrier Field-Effect Transistors	26
Kayal, A.		Probing Localisation of Excitons in TMDCs	27
Krause, M.		Phase and microstructure evolution of SnOx:Ta thin films as a function of the oxygen partial pressure during deposition	28
Otto, F.	P3	Chiral superconducting thin films	29
Pratasouskaya, A.	P4	Interface-engineered 2D Material Field-Effect Transistors for Selective Gas Sensing	30
Puddu, A.		Scalable Quantum Photonics: Electrically Driven Single-Photon Sources at Telecommunication Wavelengths	see p. 20
Radha Krishnan, G.	P4	Top-Down Fabrication of Intrinsic SiGe Nanowires with Al Contacts for RFET Devices	31
Rafiei, A.	P5	Photoconductive THz emitters based on nonpolar semioconductors	32
Saha, K.		Highly p-doped Germanium Junctionless Nanowire Transistors	33
Sauer, M.	P6	F4-TCNQ induced electronic properties on graphene	34
Shameem, R.	P7	Integrating Granular DNA-templated 1D Gold and 2D Graphene	35
Soe, Ch. T.	P8	Gold-Assisted Sequential Exfoliation: A Simple Route to Ultraclean TMDC Heterostructures	36
Stein, L.	P9	Towards a MeV Ultrafast Electron Diffraction Instrument at ELBE/DALI: Current Progress and Outlook	37
Uykur, E.		Building 613: Raman, IR, and beyond	38
Vinod, A.	P10	Towards imposing spin-texture in graphene	39

1) Posters should be mounted on arrival, and should be on display the whole time.
2) Please, remove your poster latest on the last day before lunch.
